

# PLATINUM SAFES

## KEY CABINET MX INSTRUCTIONS

### **1. SET UP INSTRUCTION**

- a) Slide silver panel on right hand side of key pad to the right to expose key lock within battery compartment.
- b) Use override key with these instructions to turn in the cylinder and open the door
  - key will turn anti-clockwise to the 11.00 position which will then allow the silver knob to turn
  - **Retain the override keys in a safe place should they be needed in the future. If codes are lost or damage occurs to the digital touch code pad, these keys will allow you open your cabinet door.**
- c) Insert 4 x "AA" batteries supplied with the safe instructions into the battery compartment. The LCD auto scans, then displays "AllrEADY" during this the colour of LCD screen will be lit up in orange. At same time buzzer beeps several times.
- d) Pre-set factory codes are as follows (Both of these will open the cabinet)
  - **Personal Code: #1234# (original factory no.)**
  - **Master code: #123456# (original factory no.)**
  - **To Hide your code on the display Press # to start the process then enter "C" followed by your code. This in turn will now show your code on the display as "oooooo" should you wish to conceal it for security reasons**
- e) If long delays occurs whilst entering your code, the system may revert back into sleep state.
  - If in sleep state, if "#" is pressed, lock wakes up and start the opening process again
- f) In sleep state, LCD screen shows date and time.
- g) Press button "C" to edit the date and clock on the safe
  - Example. 03-10-19 10.45am
  - Date (Day/Month/Year) 031019
  - Clock (Hour/Minute) 1045

### **2. HOW TO SET NEW PERSONAL CODE (2 METHODS)**
